Eco friendly Landscape and Swimming Pool Building Products

We also Manufacture Import and Supply a variety of garden landscapes & Swimming pools building products that are widely used in the construction field and are the best options for Architects, Landscape Architects, Builders & Developers.

Hydro drain cells: Hydro drain cell is a lightweight, high strength modular drainage cell which is especially designed for sub-surface drainage and waterproofing membrane protection. Hydro drain cells are manufactured from high strength Polypropylene and are used in various applications like terrace gardens, planter and podium systems, basement retaining walls, landscape decks, Pond filtration systems, sports fields, agri - horti applications etc.

AN ISO 9001:2008 CERTIFIED COMPANY.

Geo textiles: The non woven geo textile fabric is an assembly of synthetic fibers, put together, which are bonded to form a single layer, commonly made of non woven polypropylene geo textiles and polyester types. Geo textile fabrics are manufactured based on typical required application. They used in areas like Road construction and highways, Asphalt repaving of roads, Coastal and riverbank revetment systems, Shore protection in reclamation works, Filtration, Drainage, Composites, Protection for geo membrane in landfills, Landscaping, Agriculture, Horticulture & Floriculture, Water proofing in rivers, canals and dams, Irrigation and water retention, Airport Runways, Soil erosion control etc.

Grass Pavers: These grass pavers are used in applications like Emergency and fire lane access areas, vehicle parking lots in commercial developments, homes, sports complexes, festival grounds, churches and spaces for the handicapped, Golf cart paths, Street shoulder parking, Racetrack infield and pit areas, Drainage channels, Slope stabilization and erosion control etc.

Vertical Green wall Garden: The Green Wall Garden is new service introduced, where we assist customers in setting up Vertical Gardens/ Green Walls to enhance their inner and outer living spaces. The main aim of setting up green walls is to blend nature with the existing ambience.

Lattice / Trellis: Using Eco Screen Plastic Lattice, you can create beautiful features around your home, garden or courtyard, simply and economically. Eco Screen Plastic Lattice combines deep timber texture and warm rich colours. Lattice panels are produced in one piece and are guaranteed to give many years of maintenance-free enjoyment. These imported panels are widely used in extension of compound walls, duct areas, partitions, decorative false ceilings, fencing, arches, parking tents and gardens, creating canopy's and gazebos etc.

AN ISO 9001:2008 CERTIFIED COMPANY.

Landscape Swimming Pool Water Feature Consultants

Artificial Grass: The use of artificial grass in gardens and various types of green areas is becoming more and more common. Usually people are used to seeing artificial grass only at doorsteps, hallways, on the edges of pools, terraces etc. Now the materials make artificial grass more comfortable also in the garden, at green areas and parks. Artificial grass looks good and feels comfortable. It also suits well in places where taking care of a natural grass would be hard. You could create a lush of greenery any where indoor or outdoor, interior or exterior.

FRP Decorative Products: Sculptures / Furniture / Murals / Planters / Water Falls & Fountains

Illuminated Planters: Planters, Pots and Vases.

AN ISO 9001:2008 CERTIFIED COMPANY.

Murals:

Letchusa Self Watering Planters From Germany.

The unique advantages of LECHUZA planters:

Better plant growth thanks to a balanced supply of water to the roots. • Less watering – Plants receive the water they need from the water reservoir. • Changing plantings is easy. The removable plantliners can be exchanged on the spot and easily moved for space-saving winter storage. • Mobile even when planted – coasters make moving even large planters child's play. • Quality – made in Germany under the highest production standards.

Under Water LED Lights. For Fountains.
