KENZINE MAKES
PLANTING
EASY

KENZINE

www.kenzinetrades.com

Kenzine is a business venture specialized in Importing & Distribution of all kind of Flower pots & Landscaping products. Our main products cover self-watering planter, which are favored by users because of its applicable self-watering system and usefulness as flower pots in Indoor & Out door.

The concept of Self-watering/Sub-irrigation System with water reservoir at bottom of the pot provide your plants with exact amount of water they needs for optimum growth up to 12 weeks. The Flowerpot-set includes inner-pot and outer-pot, available on different models & colors.

Artificial Grass is our next major key Product, Which used for Indoor & Outdoor Landscaping, Courtyards, Sports courts & play grounds etc.

Plants are natural spirit and air purifiers, which distribute its fragrance, refreshing people. Nowadays many people are growing plants at their homes, but in fact we could not spend enough time to stay with the plants because of our heavy life. Such pace of life will make our beloved plants injured and withered. Kenzine self-watering are your best choice to keep your plants flourishing The feature of Kenzine flowerpot is self-watering, tightness, easy to move, Anti-UV, freezing resistance, sterility, environmental protection and both for planting inside and outside. It can help us purify the air and provide comfortable and clean living environment. The feature of beautifully design and self-watering let us easy to plant and increase the planting interest and help to relax

The Kenzine Flowerpots & Artificial Grass can be used widely, such as Home, Office, Restaurants, Shopping mall, Schools, Airport, and so on.

We do serve all kind of Landscaping Works, Artificial Grass installation, Indoor Plants setting, Vertical Garden arrangements with highly professional and economical way.

Kenzine is a one stop solution for all landscaping needs

Planter Box Planting

1

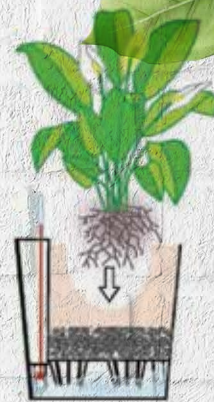

Pave the stone or clay at the bottom of the inner tube

2

Put the nutritive soil fit for growing on the Stone or clay

3

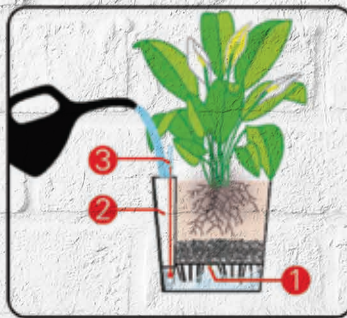

Put the plant into inner tube and then filled with nutrient soil

The maintenance of Planter Box

In the initial three months, Please be sure to follow common ways of watering, that is, watering the soil surface at least once a week until the buoy moves up. It can release fertilizer to promote root growth. If not careful watering so much that it over Max, you can pull out the plug at the bottom of pot to drain excess water out.

After three months of the initial watering, the roots grow in good condition, which need water hole injection of water into the bottom making the water level measurement mark reach to the Max, and now your plants will be watered by self-watering system.

Plants need fertilizer. After the initial watering, every once in a while, please according to the using method to add the corresponding liquid fertilizer. Water planters form the surface often so that soil nutrients will be evenly distributed.

Plant indoor & outdoor

When the Planter Box pot planted in indoor, you must tighten the plug at the bottom of pot. For the first time, you should check whether the plug is tight, if it's lax, please tighten it. When you plant it outdoor, please take out the plug, so that the excess water can be rained out.

Features

- ▶ Self watering system.
- ▶ Be coated, looks like ceramic. We painted third to ensure its quality is the same as automobile surface painting.
- ▶ Durable and UV resistant, these pots look like new, for longer.
- ▶ Suitable for indoor and outdoor usage.
- ▶ Lightweight therefore easy to move around. For big one, there is hidden pulley in the bottom.
- ▶ Inserted parts design.
- ▶ Heat and cool quickly so plant roots and micro organisms are not damaged as easily even when in a sunny location.
- ▶ Waterproof thus these pots are easy to clean, will resist bacteria growth and prevent leaks.
